- Lockable and removable rear wall
- Cable entry at top and bottom
- Earthing kit
- Twin swivel castors with 2 brakes
- Powder coating RAL9005 black
- Weight including packaging 70 kg (20 kg pack.)

The following noise levels affect human behavior:

- Even at 45 dB (A), a relaxed conversation is more difficult.
- At 50 dB (A) sufferers raise their voices.
- At 60 dB (A), sufferers must speak aloud.
- At more than 65 dB (A) external load, residents change their behavior, ie. h., they keep windows closed and balconies are no longer used.

Our SUPER SILENT fan are designed for very sensitive earphones that want extra quiet fans.

Advantages: Multiframe fans, in contrast to conventional fans, prevent the transmission of structure-borne noise to the server housing. The operating volume is drastically reduced. New position-invariant magnetic levitation bearings and an outstanding drive enable an excellent volume-to-volume ratio.

The result:

When installed, multiframe fans are up to 30% quieter than standard fans, extremely durable and fail-safe.
