Product Overview

The 483 mm (19") IP55 Outdoor Wall Mounting Cabinets are designed for industrial applications. They are based on the IP55 safety class which conforms to the EN 60529 and is therefore protected against water-and dirt ingress. The fan and filter components are based on safety class IP54. Best performance is provided e.g. via the 3-point locking system with lockable swing handle and isolated cable entries. Integrated air ventilation inlets ensure the entry of fresh air (protection against water and dust acc. to IP54). Application areas are open areas that are under the effect of the environment (rain, dust, sleet, snow, and splashing water). An alternative version with a double-wall structure in the inside suits for better protection against temperature fluctuations. Furthermore, it can be used for easier mounting of e.g. cable management components.
