As an optional complement to our high-quality stainless steel server cabinets, we offer FLH Radiant Heaters. This product range includes models from FLH 060 to FLH 150, specifically designed to prevent insufficient temperatures or excessive humidity levels within electrical enclosures. When combined with a thermostat or hygrostat, they ensure the ideal heating performance.

The FLH Radiant Heaters provide power ratings ranging from 10 to 150 watts, ensuring that the correct heating capacity is always available. This enables the precise distribution of required heat within the enclosure.

Key features of our Radiant Heaters include:

- Standard radiant heating suitable for various applications.
- A versatile power range depending on specific needs.
- Multiple connection options for easy integration.
- Ideal for small enclosures and electrical cabinets.

Lehmann IT is your trusted partner for cooling solutions that guarantee the protection and optimal performance of your electronic devices in any environment.
