Super SILENT fan for 19" Server Rack

The damping system integrated into the suspension of this fan series absorbs any vibrations that occur between the fan and the bracket, making additional decoupling unnecessary.

kW

The integrated damping system does not change the installation dimensions of the fan so that it can be installed in any commercially available 120mm bracket. Thus, the smooth-running, ball-bearing fan in combination with the integrated damping system guarantees minimal running noise.

The screwless brackets can be removed and reattached rotated by 180° so that the fan is not only able to generate a pushing but also a pulling airflow.

Technical data:

Fan dimensions (H/W/D) 25/120/120mm
 Fan speed 1200 rpm
 Rated voltage 12V
 Power 0.8W
 Airflow < 60 m³</p>
 Noise level 20dBA
 Connection type 3 Pin
